Areas of the Standard Normal Distribution

The entries in this table are the probabilities that a random variable, with a standard normal distribution, assumes a value between 0 and z; the probability is represented by the shaded area under the curve in the accompanying figure. Areas for negative values of z are obtained by symmetry.

Second Decimal Place in <i>z</i>										
	0.00	0.01	0.02	0.03	0.04	0.05			0.0319	0.09
